The Fourth Industrial Revolution - Klaus Schwab 2017-01-03
World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an

opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or

implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

International Handbook on Teaching and
Learning Economics - Gail Mitchell Hoyt 2012
The International Handbook on Teaching and
Learning Economics is a power packed resource
for anyone interested in investing time into the
effective improvement of their personal teaching

methods, and for those who desire to teach
students how to think like an economist. It sets
guidelines for the successful integration of
economics into a wide variety of traditional and
non-traditional settings in college and graduate
courses with some attention paid to primary and
secondary classrooms. . . The International
Handbook on Teaching and Learning Economics
is highly recommended for all economics
instructors and individuals supporting economic
education in courses in and outside of the major.
This Handbook provides a multitude of rich
resources that make it easy for new and veteran
instructors to improve their instruction in ways
promising to excite an increasing number of
students about learning economics. This
Handbook should be on every instructor's desk
and referenced regularly. Ð Tawni Hunt
Ferrarini, The American Economist
In
delightfully readable short chapters by leaders
in the sub-fields who are also committed
teachers, this encyclopedia of how and what in

teaching economics covers everything. There is nothing else like it, and it should be required reading for anyone starting a teaching career and for anyone who has been teaching for fewer than 50 years! Daniel S. Hamermesh, University of Texas, Austin, US The International Handbook on Teaching and Learning Economics provides a comprehensive resource for instructors and researchers in economics, both new and experienced. This wide-ranging collection is designed to enhance student learning by helping economic educators learn more about course content, pedagogic techniques, and the scholarship of the teaching enterprise. The internationally renowned contributors present an exhaustive compilation of accessible insights into major research in economic education across a wide range of topic areas including: Pedagogic practice teaching techniques, technology use, assessment, contextual techniques, and K-12 practices. Research findings principles courses,

measurement, factors influencing student performance, evaluation, and the scholarship of teaching and learning. Institutional/administrative issues faculty development, the undergraduate and graduate student, and international perspectives. Teaching enhancement initiatives foundations, organizations, and workshops. Grounded in research, and covering past and present knowledge as well as future challenges, this detailed compendium of economics education will prove an invaluable reference tool for all involved in the teaching of economics: graduate students, new teachers, lecturers, faculty, researchers, chairs, deans and directors.

Global Economic Prospects, June 2021 - World Bank 2021-08-03

The world economy is experiencing a very strong but uneven recovery, with many emerging market and developing economies facing

obstacles to vaccination. The global outlook remains uncertain, with major risks around the path of the pandemic and the possibility of financial stress amid large debt loads. Policy makers face a difficult balancing act as they seek to nurture the recovery while safeguarding price stability and fiscal sustainability. A comprehensive set of policies will be required to promote a strong recovery that mitigates inequality and enhances environmental sustainability, ultimately putting economies on a path of green, resilient, and inclusive development. Prominent among the necessary policies are efforts to lower trade costs so that

trade can once again become a robust engine of growth. This year marks the 30th anniversary of the Global Economic Prospects. The Global Economic Prospects is a World Bank Group Flagship Report that examines global economic developments and prospects, with a special focus on emerging market and developing economies, on a semiannual basis (in January and June). Each edition includes analytical pieces on topical policy challenges faced by these economies.
